

# Release Notes

## Supported Products:

- OBi300
- OBi302

## Firmware Version: 3.1.1 (5491)

January 19, 2017

### Features and Enhancements:

- 64 hex digits, i.e. 32 byte WPA-PSK support.
- New parameter called "DeviceInfo.WAN.OpenSSLCiphers" to control the ciphers used for SSL connections.
- DFS support at 5GHz for OBiWiFi5G wireless adapter accessory.

### Bug Fixes:

- Continual re-transition of Un-REGISTER requests until timeout, ignoring server response.
- ACS server cannot read **Device.Status.PhonePort.{i}**. object.
- Accept a URL as a DHCP option 66 value.
